

HULL PRO

COMPETITOR COMPARISON

HULL PRO PROVIDES BETTER COVERAGE, IS MORE DURABLE AND LONGER-LASTING, AND SELF-LEVELS BETTER THAN OTHER COATINGS. SEE HOW CHOOSING TO PROTECT YOUR VESSEL WITH HULL PRO GIVES YOU BOTH PROTECTION AND PERFORMANCE.

At Armus, we believe in protecting and prolonging the lifespan of your vessel. Originating from use on Greek cargo ships, we've developed Hull Pro, our clear hull protectant for commercial and personal use. We know what's in the market today, and we've done real-world tests and demos to compare our product with what's out there.

HULL PRO FEATURES:

BIOCIDE-FREE

INCREASE SPEED BY UP TO 10%

DURABLE - WON'T CHIP OFF ON BOAT LIFTS

SAVE UP TO 17% ON FUEL COSTS

FOULING RELEASE

EASY TO CLEAN

MAINTENANCE

Using Hull Pro offers hull protection and better fuel and speed performance; however, regular maintenance is still required. If you want a beautiful hull, we recommend cleaning your vessel at least once a week. We see this most with seafaring vessels, because saltwater and warmer temperatures create quick and healthy growth and fouling.

Hull Pro has no biocides, and is a fouling-release formulation, which means fouling and growth will still appear on your hull. We do recommend regular cleaning, depending on your water type. When compared to bare gelcoat or a ceramic hull coating, a Hull Pro-coated vessel requires less cleaning. Hull Pro does require the same amount of cleaning as Hull Maxx, but it is more durable and lasts longer.

For lakeside vessels, organic growth and fouling is not so prominent on bare metal or gelcoated hulls. We've heard from customers who have left their lakeside Hull Pro-coated vessels for weeks, and even up to a full season without cleaning. When they come back to their vessels, they simply pull at the end of the season, and gas power wash at 3500 PSI minimum.

ENVIRONMENTALLY FRIENDLY

A traditional bottom paint or anti-fouling paint can help prevent growth on your hull, however they contain biocides which are harmful to aquatic life and even applicators. They are also abrasive and self-sacrificial, which means you'll have to repaint your vessel every season with harmful chemicals. Because of the anti-fouling biocides on traditional bottom paints, growth and fouling will not appear on your hull and less cleaning is required. However, these biocides are harmful to aquatic life and the environment.

IF YOU'RE UNSURE IF HULL PRO IS RIGHT FOR YOU, CONTACT US AT INFO@ARMUSSOLUTIONS.COM AND WE'LL PUT YOU IN TOUCH WITH ONE OF OUR HULL PRO EXPERTS.

PRICE

Hull Pro is set at a higher retail than Hull Maxx, but it offers over 2X the coverage without the need for a primer. Our product ships and is available for purchase in smaller kits (8.5oz & 17oz) to provide you with a longer working time during application, and the ability to coat smaller vessels.

\$80 / LINEAR FT

17oz covers
~15 Linear Feet

\$100 / LINEAR FT

Including Primer Cost
1 Quart (32oz) covers
~11 Linear Feet

**\$35-50 /
LINEAR FT**

Requires recoating
every 1-2 seasons

**\$25-50 /
LINEAR FT**

Will not last below the
waterline

SELF-LEVELING FINISH

You've got to see it to believe it. When we say self-leveling, that's exactly what we mean. When applied using our recommended rollers, Hull Pro levels out beautifully over bare metals and over bottom paints.

FLAT FINISH

FOULING-RELEASE

The ultra-smooth finish of Hull Pro makes your vessel easy to clean and maintain. Our users have reported that they no longer scrape weekly, and have switched to bottom cleaning only every 3 weeks!

**INCREASE VESSEL SPEED
& FUEL ECONOMY**

By applying Armus Hull Pro over bare gel coat, you can increase your vessel speed. Our competitor only reports increased vessel speed compared to anti-fouling bottom paint.

UP TO
**10% SPEED INCREASE
17% FUEL SAVINGS**

ULTRA-DURABLE

Armus Hull Pro is a hard epoxy coating, meaning it won't chip off or crack. This makes it easy to dry-dock, trailer or transport your vessel, and makes your hull resilient against dings and scratches!

MAY CHIP OFF
ON BOAT LIFTS
OR ON IMPACT
WITH DOCKS

ABLATIVE &
LASTS ONLY
~1-2 SEASONS

COMES OFF IN
THE WATER

ECO-FRIENDLY

Armus Hull Pro is a biocide-free hard silicon epoxy. Unlike our competitors' coating, scuffing or scratching the coating will not release microplastics. Microplastics are currently the #1 ocean pollutant.

**BIOCIDE-FREE &
NO MICROPLASTICS**

MAY CREATE

& PRIMER REQUIRED

GREAT FOR BOAT LIFTS

Unlike other coatings, Hull Pro is hard enough to protect your vessel when it is stored on a boat lift, or lifted. If you coat your vessel with Hull Pro, it won't move on the forks or straps when it's being transported, nor will it tear or chip if your vessel lives on a lift.

**WON'T CHIP OR MOVE
WHEN BEING LIFTED**

COATING MAY TEAR
OR CAUSE
VESSELS TO
