

SMART, SUSTAINABLE
NANO-FORMULATED SOLUTIONS

WOOD GUARD

SEE WHY THE PROS CHOOSE WOOD GUARD.
BETTER PERFORMANCE.
BETTER PROTECTION.
BETTER FINISH.
BETTER FOR THE ENVIRONMENT.

APPLICATION & POST-APPLICATION CARE

With the proper care, Wood Guard can provide long-term protection for your decks, docks, flooring, and more!

Application is simple and you can even do it yourself. Spray on Wood Guard for a nice even coverage and let its nano-particles do the heavy-lifting for you to protect your wood surfaces. Check out our website for our Application Guide.

Post-application, clean-up is simple. Liquid stains bead up on the wood surface, so all you have to do is wipe with a dry or damp cloth, or use mild soap and water.

The days of harsh chemicals, bleached surfaces, water stains and oil stains are over!

Questions about application, your wood surface, or post-application care? We've got you covered and we're here to help!

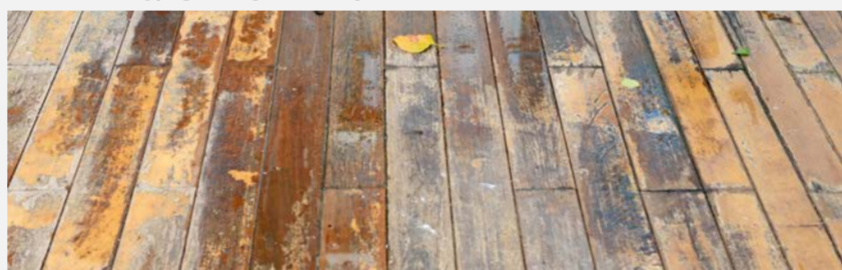

PREVENT WATER & OIL DAMAGE WHILE KEEPING WOOD SURFACES LOOKING NATURAL!

MOLD & ORGANIC GROWTH

Unlike varnishes, Wood Guard creates a water and oil-repellent barrier to protect wood surfaces without sealing them. Without water ingress, mold and moss can't take hold of the surface and spread over wood surfaces.

WATER & OIL STAINS

The days of scrubbing out water stains, oil stains from food or sunscreen, even red wine stains are over! Keep your wood looking natural while keeping it protected!

WARPING / CUPPING FROM WATER DAMAGE

By preventing water from seeping into wood surfaces, Wood Guard is perfect for decks and flooring to prevent cupping and warping from water exposure or water damage.

YOU'VE GOT TO SEE IT TO BELIEVE IT

WOOD GUARD-PROTECTED

UNTREATED WOOD SURFACE
